

# BALSEAL Ethernet Switch

## Link type more

**Ethernet SwitchLink type more**

**Ethernet switches for harsh environments**

**Suitable for industrial automation, power system  
and traffic control system**

**Ethernet communication solution**

# Designed for harsh environments

Switches are specially designed for the following situations:

- Industrial automation system
- The power system
- Traffic control system

**Industrial  
automation system**

**•The power system**

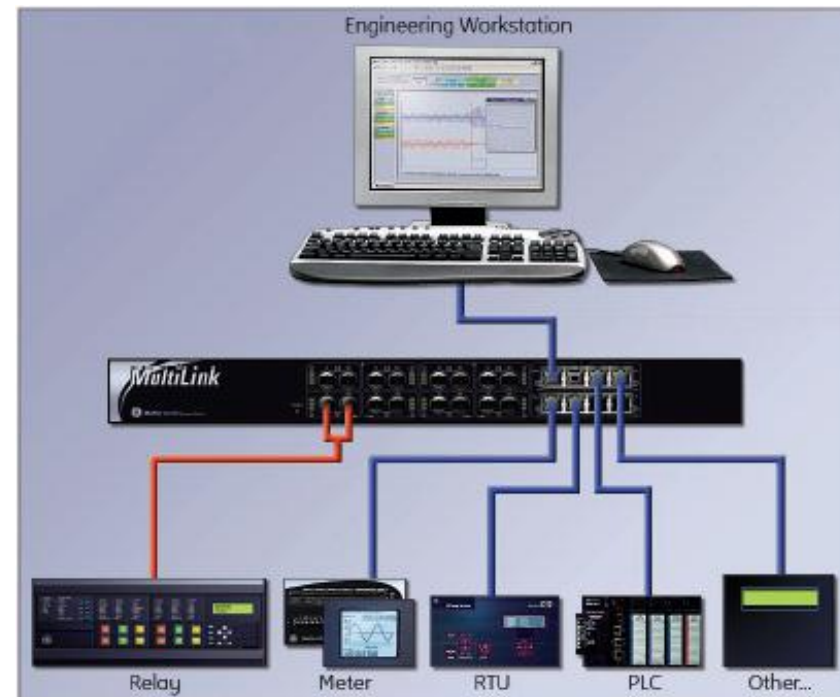

**•Traffic control system**

# Strict industrial network requirements

These are unique industry markets for communications equipment

Special requirements that traditional products do not have are proposed, including:

- Tolerance to harsh industrial working conditions
- High degree of security
- High reliability
- Easy to set up and maintain

# The highest level of network security performance

Switches provide the highest level of network security performance. All network management functions are protected from unauthorized access:

- **SNMPv3** -
- **Secure Web Management**
- **Remote Access Security**
- **Password Security**
